

### ABSTRACT OF THE DISCLOSURE

A table supporting means 7 is provided at an upper end thereof with a loop 9. The loop 9 is hung on the headrest 5 of the motor vehicle seat 1 so that the table supporting means 7 is positioned substantially vertically. The loop 9 is removable from the headrest 5. A plate-shaped table 11 has a table holding means 15. The table holding means 15 holds the table 11 vertically rotatably by means of a horizontal shaft 13. The table holding means 15 is provided with a vertical hole 17. The vertical hole 17 has a larger diameter than the table supporting means 7. The table supporting means 7 is passed through the vertical hole 15 of the table holding means 15. A vertical bolt 19 is threadedly engaged with the table holding means 15. A lower end 19a of the vertical bolt 19 is in contact with a base portion 11a of the table 11 so as to maintain the table 11 at a desired angle.
